Docket No. OOP-1211/CP 1
Rockville, MD 20852

Dear Commissioner Henney,

I am writing to express my strong support for premarket safety testing and labeling of all genetically engineered foods. I also have strong feelings about the need for further review of the legalization of rGBH for use in dairy farming. I have a background in the life sciences and keep fairly well abreast of the literature in nutritional fields. What I have read, and more importantly, the studies which I have not seen done on these new technologies is disturbing to me and the way the FDA has been railroaded into extending its blessing over these products is unconscionable.

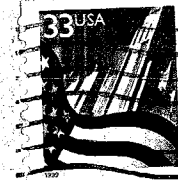

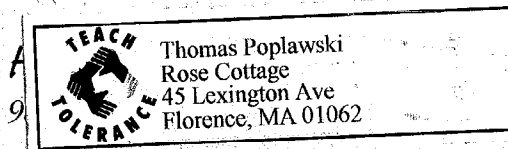

Respectfully,

Thomas Poplawski
